DEVELOPMENT OR UPDATE

- » Start by gathering materials from your operations and activities:
 - » Existing: Should already have SWPPPs & inspections, SOPs, identification of activities, tracking methods for wastes and maintenance
 - » New: What and how is it done? Street sweeping, maintenance, salt storage, facilities, personnel training...
- » Compare current activities to MS4GP language
 - » Existing: What needs added and what is no longer required?
 - » New:
 - Don't reinvent – use materials available from USEPA, INAFSM, LTAP, etc.
 - What is already tracked and recorded?
- » Mark off completed items on MS4GP as you go
